

Installation with JIRA Cloud

- [Requirements](#)
- [Installing the addon](#)
- [Getting started](#)
- [More information](#)

Requirements

If you did not read the [Requirements](#) before, please do so before proceeding.

Installing the addon

The addon is called "**dynaBOARD**" and is available in the marketplace.

1. Log into your JIRA cloud instance with your administrative user
2. Go to [JIRA Administration](#) (cog wheel on the top right menu) and click on [Add-ons](#)
3. Click in the "Search the Marketplace" field and type **dynaBOARD**
4. When the search is completed and the **dynaBOARD** addon is shown, click on the "Free trial" button
5. The installation proceeds, and afterwards you can start with **dynaBOARD**.

Getting started

Once the installation is complete, you need to reload the page (or just click on some other item in the top menu), and a button with the label "dynaBOARD" appears in the top navigation menu.

Clicking it will take you to **dynaBOARD**, and your partner user (which you need for administration) is created automatically.

The **dynaBOARD** user interface is loaded right into JIRA, so you still have your JIRA navigation menu at the top.

More information

Please proceed to the [Partner guide](#) for further information about how to set up your customers / teams in **dynaBOARD**.
